THE SOURCE EVALUATIONS IN THIS REPORT ARE DEFINITIVE.
THE APPRAISAL OF CONTENT IS TENTATIVE.
(FOR KEY SEE REVERSE)

1. Medical research in Rumania could be carried out in the clinics of the medical schools at Bucharest, Cluj, Iasi, Timisoara, and Targul Mures. In practice, however, little if any research was carried out because the newer personnel who had replaced the ousted faculty members were not well qualified. In addition, [REDACTED] the emphasis was on teaching rather than on research. Any research had to be done on the individual's own time, which was scarcely available. 25X1X

2. Medical research could also be carried out at the Parhon Institute in Bucharest. [REDACTED]

was named after Parhon, a former president of the Rumanian Republic, whose son-in-law, Dr. Milou (fnu) was Director of Research. It was state-supported and physicians worked at the Institute for specialized training. Endocrinological studies were emphasized.

3. Research could also be carried out at the Cantacuzino Serum and Vaccine Institute (Cantacuzino Institutul de Seruri si Vaccinuri) in Bucharest. The primary task of this Institute was to produce biologicals; research work was secondary. 25X1X
